Vanguard S&P Mid-Cap 400 ETF | IVOO

As of March 31, 2026

Investment approach

- Seeks to track the performance of the S&P MidCap 400 Index.
- Mid-cap equity.
- Employs a passively managed, full-replication strategy.
- Fund remains fully invested.
- Low expenses minimize net tracking error.
- On March 14, 2023, this ETF underwent a 2:1 share split, which decreased the price per share of the ETF with a proportionate increase in the number of shares outstanding. Historical share price data has not been adjusted for the split except where market data is being used, as indicated. Although certain data may reflect both pre-and post-split prices, returns are not impacted.

About the benchmark

- The S&P MidCap 400 Index is composed of mid-cap stocks from the broad U.S. equity market.
- Includes stocks of 400 medium-sized U.S. companies, representing a spectrum of industries. On average, these stocks have smaller market capitalizations than those in the S&P 500 Index.

Performance history

Total returns[2] for period ended March 31, 2026

IVOO (Inception 2010-09-07)	Quarter	Year to date	1 year	3 years	5 years	10 years	Since inception

Market price return[4]	2.57	2.57	17.42	12.03	6.84	10.48	11.70
S&P MidCap 400 Index	2.50	2.50	17.35	12.09	6.92	10.58	11.82

The performance data shown represent past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, so investors' shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data cited. For performance data current to the most recent month-end, visit our website at vanguard.com/performance. The performance of an index is not an exact representation of any particular investment, as you cannot invest directly in an index.

Fund total net assets	$4,953 million
Inception date	2010-09-07

Trading information

Ticker symbol	IVOO
CUSIP number	921932885
IIV (intra-day ticker)	IVOO.IV
Index ticker (Bloomberg)	SPTRMDCP
Exchange	NYSE Arca

1. As reported in the most recent prospectus. A fund's current expense ratio may be lower or higher than the figure reported in the prospectus.
2. Figures for periods of less than one year are cumulative returns. All other figures represent average annual returns. Fund performance figures assume the reinvestment of dividends and capital gains distributions; the figures are pre-tax and net of expenses. The above widely used comparative index represents unmanaged or average returns on various financial assets that can be compared with the fund's total returns for the purpose of measuring relative performance.
3. As of 4 p.m., Eastern time, when the regular trading session of the New York Stock Exchange typically closes.
4. Effective July 15, 2024, the market price returns are calculated using the official closing price as reported by the ETF's primary exchange. Prior to July 15, 2024, the market price returns were calculated using the midpoint between the bid and ask prices as of the closing time of the New York Stock Exchange (typically 4 p.m., Eastern time). The returns shown do not represent the returns you would receive if you traded shares at other times.

Communication Services	1.0
Other	0.0

1. Represents the expense ratio for the Vanguard ETF as reported in the most recent prospectus. There are material differences between mutual funds and ETFs. Unlike mutual funds, ETFs are priced continuously and bought and sold throughout the day in the secondary market (at a premium or discount to net asset value) with the assistance of a stockbroker, which entails paying commissions. Sources: Lipper, a Thomson Reuters Company, and Vanguard, December 31, 2025.
2. For most recent fiscal year. Turnover rate excludes the value of portfolio securities received or delivered as a result of in-kind purchases or redemptions of the fund's capital shares, including Vanguard ETF Creation Units.
3. A measure of the volatility of a fund—based on the fund's last three years of monthly returns—used to indicate the dispersion of past returns. A higher standard deviation means a greater potential for volatility. For funds with less than 36 months of performance history, standard deviation is not calculated.
4. The holdings listed exclude any temporary cash investments and equity index products.
5. Sector categories are based on the Global Industry Classification Standard ("GICS"), except for the "Other" category (if applicable), which includes securities that have not been provided a GICS classification as of the effective reporting period.

Vanguard ETF Shares are not redeemable with the issuing Fund other than in very large aggregations worth millions of dollars. Instead, investors must buy and sell Vanguard ETF Shares in the secondary market and hold those shares in a brokerage account. In doing so, the investor may incur brokerage commissions and may pay more than net asset value when buying and receive less than net asset value when selling.

All ETF products are subject to risk, which may result in the loss of principal. Prices of mid-cap ETF products often fluctuate more than those of large-cap ETF products.
