CSOP Tesla Daily Max (2x) Leveraged Product

Stock Code : 7766

All Information as of 31 August 2026

IMPORTANT:

With effect from 3 August 2026, the Products will adopt a flexible leverage structure under which the leverage factor of each leveraged Product may vary on a daily basis depending on market circumstances, subject to the maximum leverage factor of two times (2x).

CSOP TESLA DAILY MAX (2X) LEVERAGED PRODUCT

- Investors should refer to the Products' websites and the HKEX's website at www.hkexnews.hk for the targeted leverage factor of the Products for the next Trading Day, which will be published as soon as reasonably practicable after market close on each Trading Day, and for Products whose Underlying Stocks are traded in markets in substantially different time zones from Hong Kong, before the market opens on the next Trading Day.
- The Product adopts a flexible leverage structure, under which the leverage factor may vary on a daily basis, subject to a maximum leverage factor of two times (2x). While the Manager will seek to maintain the leverage factor at two times (2x) under normal market conditions, under certain market circumstances (e.g. capacity constraints or actual market conditions), the leverage factor of the Product applicable to a particular Trading Day may be lower or substantially lower than the maximum leverage factor (i.e. lower than two times (2x) and may be as low as 1.1 times, under extreme market conditions).
- CSOP Tesla Daily Max (2x) Leveraged Product (the "Product") is a sub-fund of CSOP Leveraged and Inverse Series, an umbrella unit trust established under Hong Kong law. Units of the Product (the "Units") are traded in HKD and USD on The Stock Exchange of Hong Kong Limited (the "SEHK") like stocks. The Product uses a swap-based synthetic replication strategy by investing directly in Swaps, so as to give the Product the Daily targeted leveraged performance of the Underlying Stock.
- This is a leveraged product. It is different from conventional exchange traded funds as it seeks leveraged investment results relative to the Underlying Stock and only on a Daily basis.
- The Product is concentrated in a single Underlying Stock. Given its non-diversified and leveraged nature, the Product is subject to extreme price volatility and may become non-viable within a short period. You may lose a significant portion or all of your investment within one day.
- Under exceptional circumstances where the Product become non-viable, CSOP may use its discretion to deviate from the investment strategy or take defensive measures, which may include liquidating swap positions and suspending trading of the Product and CSOP will issue a notice to inform investors.
- The Product is not intended for holding longer than one day as the performance of the Product over a longer period may deviate from and be uncorrelated to the leveraged performance of the Underlying Stock over the period.
- The Product is designed to be used for short term trading or hedging purposes, and is not intended for long term investment.
- The Product only targets sophisticated trading-oriented investors who understand the potential consequences of seeking Daily leveraged results and the associated risks and constantly monitor the performance of their holdings on a Daily basis
- Tesla, Inc. is highly dependent on its CEO, Elon Musk. Communications by Mr. Musk to the public may significantly impact the trading price of the Underlying Stock. Any actual or anticipated large transactions in the Underlying Stock by Mr. Musk may cause the stock price to fluctuate.
- Developments in automotive technologies (e.g., autonomous vehicle technologies) may require significant capital expenditures that may not generate profits for several years, if ever. Companies in this sector face intense competition, rapid product obsolescence, intellectual property risks, and high R&D and capital expenditures. Investors should be aware that Tesla, Inc.'s valuation may be disproportionately influenced by market optimism regarding its perceived success in its development of AI, which, if unmet, could lead to substantial volatility in stock price.
- The trading price of the Units on the SEHK is driven by market factors such as the demand and supply of the Units. Units may trade at a substantial premium or discount to the NAV.

Please note that the above listed investment risks are not exhaustive, and investors should read the Prospectus and the Product Key Facts in detail before making any investment decision. Investment involves risks, investment value may rise or fall. Past performance information presented is not indicative of future performance. Investors should not rely on this material alone to make investment decisions.

Investment Objective

The investment objective of the Product is to provide investment results that, before fees and expenses, closely correspond to the Daily targeted leveraged performance of the common stock of Tesla, Inc. (NASDAQ: TSLA) (the "Underlying Stock"). The Product does not seek to achieve its stated investment objective over a period of time greater than one day.
