Hang Seng Investment Funds Series IV

Hang Seng TECH Covered Call Active ETF

September 2026

IMPORTANT RISK WARNINGS / FUND INFORMATION FOR HONG KONG INVESTORS

- Hang Seng TECH Covered Call Active ETF (the "Fund") offers both listed class of Units ("Listed Class Units") and unlisted classes of Units ("Unlisted Class Units"). Switching between Unlisted Class Units and Listed Class Units is not available.

(Capitalised terms used herein but not otherwise defined will have the same meanings as defined in the Hong Kong Offering Document of the Hang Seng Investment Funds Series IV (the "Series") and the relevant Appendix of the Fund)

- The Fund aims to generate income and maintain prospects for capital appreciation while mitigating some downside risk through the use of covered call strategy.
- The Manager employs an actively managed investment strategy for the Fund. In addition to seeking to obtain exposure to the constituent equity securities in the Reference Index in substantially the same weightings as these securities have in the Reference Index through investing directly in constituent equity securities of the Reference Index and Reference Index ETF and long positions of financial derivative instruments ("FDIs"), the Fund also writes call options on the Reference Index.
- The Fund adopts a covered call strategy which involves writing call options (including ETF options) on the Reference Index. A covered call strategy offers some downside protection but limits potential upside, such as to profit from a significant increase in the Reference Index beyond the option strike price and the premium received. Notwithstanding the downside protection of a covered call strategy, you will still suffer substantial or total loss if the Reference Index level drops significantly.
- The use of futures contracts involves risks that are potentially greater than the risks of investing directly in securities and other more traditional assets. The risks include but not limited to market risk, volatility risk, leverage risk, margin requirement risk, negative roll yields and "contango" risk, reference Index Futures position limit risk and failure of clearing house risk.
- The Fund is subject to investment risks, equity market risk, sectoral and geographical concentration risks, risks related to companies with a technology theme, risks associated with investment in FDIs, risks of investing in other collective investment schemes, termination risk, and reliance on the same group risk.
- The Manager may at its discretion pay dividend out of capital. Such distribution may represent a return of an investor's original investment or related capital gains, and may result in an immediate reduction on the Net Asset Value per Unit.
- Different classes units are subject to different pricing and dealing arrangements and may be at an advantage or disadvantage depending on market conditions. The Net Asset Value per Unit of different classes may be different due to different fees and cost arrangement applicable to the units.
- The Listed Class Units is subject to trading risks (for example, exchange traded price of Listed Class Units may be different from the Fund's net asset value), trading hour differences risk and reliance on market maker risks.
- The Unlisted Class Units is subject to currency and exchange rate control risk and currency hedging risk.

Investment Objective

To generate income and maintain prospects for capital appreciation while mitigating some downside risk through the use of covered call strategy. It should be noted that the use of covered call strategy also limits potential upside.

Past performance of the Fund may be presented only when it has an investment track record of not less than 6 months.

Distribution Information

	Intended Frequency	Record Date	Amount / Share
HKD Counter	Monthly (if any)	02 Sep 2026	HKD 0.1500

Monthly cash dividends (if any) at the discretion of the Manager. The Manager may make declaration of dividend every month. There is no guarantee of regular distribution of dividends and, if dividend is paid, the amount being distributed. The Manager may, at its discretion, pay dividend out of capital. The Manager may also, at its discretion, pay dividend out of gross income while all or part of the fees and expenses of the Fund are charged to/paid out of the capital of the Fund, resulting in an increase in distributable income for the payment of dividends by the Fund and therefore, the Fund may effectively pay dividend out of capital. Payments of dividends out of capital or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the Fund's capital or effectively out of capital may result in an immediate reduction in the Net Asset Value ("NAV") per Unit.
For full distribution history record, please refer to our website www.hangseninvestment.com *.
