IMPORTANT:
CSOP Hang Seng HK-US TECH ETF

- The CSOP Hang Seng HK-US TECH ETF (the "Sub-Fund") is a sub-fund of the CSOP ETF Series*(*This includes synthetic ETFs) (the "Trust"), which is an umbrella unit trust established under Hong Kong law. The Sub-Fund is a passively managed index tracking exchange traded fund authorised under Chapter 8.6 of the Code on Unit Trusts and Mutual Funds (the "Code"). The units of the Sub-Fund (the "Units") are traded on The Stock Exchange of Hong Kong Limited (the "SEHK") like stocks.
- The Sub-Fund's investments are concentrated in Hong Kong and the United States. The value of the Sub-Fund may be more volatile than that of a fund having a more diverse portfolio of investments and may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the Hong Kong and the United States markets.
- Many of the companies with a high business exposure to a technology theme have a relatively short operating history. Technology companies are often characterised by relatively higher volatility in price performance when compared to other economic sectors. Companies in the technology sector also face intense competition, and there may also be substantial government intervention, which may have an adverse effect on profit margins. Rapid changes could render obsolete the products and services offered by these companies. These companies are also subject to the risks of loss or impairment of intellectual property rights or licences, cyber security risks resulting in undesirable legal, financial, operational and reputational consequences.
- The Sub-Fund's synthetic representative sampling strategy will involve investing up to 50% of its NAV in funded total return swaps. In the case of swaps, the Sub-Fund may suffer significant loss if a swap counterparty fails to perform its obligations, or in case of insolvency or default of the swap counterparty(ies). The Sub-Fund may also invest in FDIs for hedging purposes.
- The trading price of the Units on the SEHK is driven by market factors such as the demand and supply of the Units. Therefore, the Units may trade at a substantial premium or discount to the Sub-Fund's NAV.
