IMPORTANT INFORMATION

Investors should not base investment decisions on this document alone. Please refer to the Prospectus for details including the product features and the risk factors. Investment involves risks. There is no guarantee of the repayment of principal. Investors should note:

- Global X China Global Leaders ETF's (the "Fund's") investment in equity securities is subject to general market risks, whose value may fluctuate due to various factors, such as changes in investment sentiment, political and economic conditions and issuer-specific factors.
- The Fund may invest in small and/or mid-sized companies. The stock of small-capitalisation and midcapitalisation companies may have lower liquidity and their prices are more volatile to adverse economic developments than those of larger capitalisation companies in general. The Fund's investments are concentrated in companies which are either headquartered or incorporated in Mainland China, Hong Kong or Macau. The Fund's value may be more volatile than that of a fund with a more diverse portfolio.
- China is an emerging market. The Fund invests in Chinese companies which may involve increased risks and special considerations not typically associated with investments in more developed markets, such as liquidity risk, currency risks, political risk, legal and taxation risks, and the likelihood of a high degree of volatility.
- The trading price of the Unit on the SEHK is driven by market factors such as demand and supply of the Unit. Therefore, the Units may be traded at a substantial premium or discount to the Fund's net asset value.
- The Fund's synthetic replication strategy will involve investing up to 50% of its net asset value in financial derivative instruments ("FDIs"), mainly funded total return swap transaction(s) through one or more counterparty(ies). Risks associated with FDIs include counterparty/ credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. FDIs are susceptible to price fluctuations and higher volatility, and may have large bid and offer spreads and no active secondary markets. The leverage element/component of an FDI can result in a loss significantly greater than the amount invested in the FDI by the Sub-Fund.
- As part of the securities lending transactions, there is a risk of shortfall of collateral value due to inaccurate pricing of the securities lent or change of value of securities lent. This may cause significant losses to the Fund. The borrower may fail to return the securities in a timely manner or at all. The Fund may suffer from a loss or delay when recovering the securities lent out. This may restrict the Fund's ability in meeting delivery or payment obligations from realisation requests.

INVESTMENT OBJECTIVES

The investment objective of the Fund is to provide investment results that, before fees and expenses, closely correspond to the performance of the FactSet China Global Leaders Index.
